4EVER BIKES

ÚVOD

Firma 4EVER a zároveň také nová značka kol byla poprvé uvedena na cyklistický trh před 18 lety. Naše společnost již od začátku preferuje vlastní montáž před dovozem hotových kol z Asie. Důvodem je především kontrola nejen nad výběrem zboží, ale také nad samotným procesem výroby. Od první chvíle jsme investovali do kvalitních technologií a hledali jsme spolehlivé obchodní partnery. V současné době nabízíme široký sortiment kvalitních jízdních kol od dětských až po celoodpružené karbonové speciály. Každý zájemce si může u nás vybrat kolo dle vlastních požadavků a také na základě doporučení našich vyškolených obchodních partnerů.

Pro výrobu rámu se používají nejkvalitnější materiály. Všechny rámy jsou testovány a mají certifikát splňující požadované normy. U karbonových rámu využíváme nejmodernější technologie Carbon High Modulus. U duralových rámu speciální technologie SWT – bez typických housenkových svárů. Klademe důraz na kvalitu montáže. Stojanová výroba zaručuje dodržení přísného režimu montáže všech komponentů.

Poskytujeme záruku 36 měsíců na celé kolo, nikoliv pouze na rám.

4E

INTRODUCTION

The 4EVER bicycle was launched by the Company when it was first established 18 years ago. From the very beginning, we have always given preference to in-house assembly rather than importing complete bikes from Asia. This has enabled us to maintain complete control over every aspect of production, including the selection of quality components. Right from the beginning we have invested in advanced technology and have made valuable alliances with reliable partners worldwide. Currently we offer a wide range of quality 4EVER machines from children's bicycles through to complete carbon 'specials' with full suspension. Every client can make a choice of 4EVER bicycle to their individual requirements and benefit from expert advice and recommendations.

We pride ourselves on our superior frame production. A strict assembly regime of all components is ensured by 'stand' production. All 4EVER frames pass rigorous testing processes for quality and performance, and are provided with a certificate declaring the fulfillment of the required norms. For carbon frames we use the most modern technology Carbon High Modulus. For alloy frames the special technology is called SWT (Smooth Welded Technology).

Furthermore, as proof of our confidence that 4EVER bicycles rival the best in Europe, we provide a full 36 month guarantee on the entire bicycle, frame and all!
